

WHERE'S YOUR DATA?

Whether your data sits on premise, in a public or a private cloud, it needs to be audited, searched, managed, and protected. NetGovern connects to an extensive list of locations allowing searches, audits, archiving, and remediation of unstructured data through a **SINGLE-PANE OF GLASS**.

CURRENTLY SUPPORTED LOCATIONS

SMB/CIFS
O365
OneDrive
SharePoint
Box for Business
ShareFile
Egnyte

Following the Information Governance best practices that we preach, we always strive to be better. That's why we are continuously building connectors to meet the needs of our customers as well as investigating other potential connectors. The list below represents prototypes and our interest in future connectors. We publish this list so that you can help us choose the next connectors we will be building.
