

TELEMESSAGE MOBILE ARCHIVER FOR NETGOVERN

MULTIPLE WAYS TO ARCHIVE

Choose any combination of methods for BYOD and enterprise phones.

Enterprise Number Archiver

- A secondary enterprise number is provided to the employee
- Employee installs TeleMessage app on their device
- Messages sent/received over the enterprise number arrive at the App

Android Archiver

- A lightweight App is installed on the employee's Android device
- A copy of all mobile SMS/MMS messages and call recordings is sent from mobile phone to the archive server
- Employee can't tamper with App

Secure Archiver

- Messages are archived by the mobile operator at the network level, a copy is sent to the archive server
- Can work for legacy phones. Enterprise only, no BYOD
- No App necessary
- Employee can't tamper with App

Secure Enterprise Messaging

- iOS & Android Apps for co-worker chat
- Send text, audio, images, video, documents, location
- Detailed delivery receipts: sent, delivered, read
